(From a Staff Correspondent.) LINCOLN, March 22 - (Special.)-There seems to be little doubt that S. F. 214. the Mattes bill to relieve manufacturing enterprises in Nebraska from payment of the annual state occupation tax, will pass the legislature and become a law. The bill is already through the senate and has been favorably acted upon by the house committee on manufacturing, retail and ommerce. So far it has had practically no opposition. It was expected that the sifting committee in the house will soon advance it and that the house will

Many Small Firms. According to the 1910 census there are 1,500 industries in Nebraska and of this difficulties." number more than one-half are doing business on less than \$5,000 capital. Only 20 per cent of the entire number have nore than \$29,000 of capital stock.

These figures show that manufacturing is still in its infancy in this state and the sentiment in the legislature favors encouraging it as far as possible by lisisimate means. It is felt that the exemption of manufacturers from the ocupation tax is a very small concession to this branch of commercial activity, onsidering what it is doing to increase the wealth and resources of Nebraska. Real Object of Tax.

The real object of the occupation tax law as passed by the legislature of 1911 and amended in 1913 was to compel the railroads and the large public service corporation to contribute a greater amount to the state in taxes. Even if manufacturers should now by exempted by the passage of S. F. 214, the state will still derive a great amount of revenufrom this source.
